Automatic Counterfeit Money Detector Cash Detector Money Detecting Machine

(Model No.:N13)

Features:

Immediate banknote verification
Reduces counterfeit losses due to human error
Saves time & labor costs
Quick and easy to use
Multi-detection: Magnetic, and infrared
Easy to use with a "Passed or failed" test
High speed: less than 1 second per bill
Currency accepted: U.S. dollar/programmable

Specifications:

Check method: pattern, magnetic, IR, UV, Safe Line
Detecting way: Put the banknote against the left of the entrance
Detecting speed:<0.5seconds/piece
Power supply: AC 110 to 240V, 50/60Hz or DC 12V/1.0A
Display: LCD white LED backlight
Rated power:<10W
Battery:rechargeable lithium battery 11.1V/3500mAH
Operation temperature:0ºC - 40ºC
Storage temperature:-20ºC - 65ºC
Carton dimensions: 850 x 390 x 295mm
dimensions: 155 x 137 x 82mm
Outer packing: 20pcs/carton
Net weight:0.6kg
Gross weight of Carton: 17kg
