

USB Trigger for Cash Drawer
BT-100U

Product Picture

Features

Simple but not easy

Cash drawer can be directly connected to the computer with BT-100U;

Powered by USB bus,
external power is not required;

Allows for "Hot Plugging",
plug and play connectivity;

Parameter

BT-100U cash drawer trigger is designed to provide USB interfacing to the cash drawer. This allows the cash drawer, which is previously connected to POS printer or cash register, to be directly connected to a USB port of the computer. This means through the USB Trigger the cash drawer can be directly connected to the computer when this no printer used in the POS system.

The BT-100U USB trigger module uses a virtual serial port driver, making it appear to software like a standard RS232 serial port. This way existing POS software can communicate with the USB cash drawer trigger as though connected to a serial port. A unique serial number is assigned to each USB trigger

module and driver software will assign the next available serial port to each device it recognizes (multiple triggers can be used on one computer).

Production Line

Capacity

| Verified | Product Name | Production Line Capacity | Actual Units Produced(Previous Year) |
|----------|-----------------|--------------------------|--------------------------------------|
| ✓ | Thermal Printer | 40,000 Sets / Month | 250,000 Sets |
