

Déclencheur USB / RS232 pour tiroir-caisse

(N ° de modèle: BT-100U / R)

Détails:

La gâchette du tiroir-caisse BT-100U / R est conçue pour fournir une interface USB / RS232 au tiroir-caisse. Cela permet au tiroir-caisse, qui est précédemment connecté à une imprimante POS, d'être connecté directement à un port USB / RS232 . Cela signifie que, par le biais du déclencheur USB / RS232, le tiroir-caisse peut être directement connecté à l'ordinateur lorsque cette imprimante n'est pas utilisée dans le système POS.

Le module de déclenchement BT-100U / R USB / RS232 utilise un pilote de port série virtuel, ce qui le rend apparent à un logiciel comme un port série RS232 standard. De cette façon, le logiciel POS existant peut communiquer avec le déclencheur de tiroir-caisse USB / RS232 comme s'il était connecté au port série. Un numéro de série unique est attribué à chaque module de déclenchement USB / RS232 et le logicielDriver attribuera le prochain port série disponible à chaque périphérique qu'il reconnaît (plusieurs déclencheurs peuvent être utilisés sur un ordinateur).

Détails du produit:

USB Trigger for Cash Drawer
BT-100U

Product Picture

Features

Simple but not easy

Cash drawer can be directly connected to the computer with BT-100U;

Powered by USB bus,
external power is not required;

Allows for "Hot Plugging",
plug and play connectivity;

Parameter

BT-100U cash drawer trigger is designed to provide USB interfacing to the cash drawer. This allows the cash drawer, which is previously connected to POS printer or cash register, to be directly connected to a USB port of the computer. This means through the USB Trigger the cash drawer can be directly connected to the computer when this no printer used in the POS system.

The BT-100U USB trigger module uses a virtual serial port driver, making it appear to software like a standard RS232 serial port. This way existing POS software can communicate with the USB cash drawer trigger as though connected to a serial port. A unique serial number is assigned to each USB trigger

module and driver software will assign the next available serial port to each device it recognizes (multiple triggers can be used on one computer).

Production Line

Capacity

Verified	Product Name	Production Line Capacity	Actual Units Produced(Previous Year)
✓	Thermal Printer	40,000 Sets / Month	250,000 Sets

✓	Dot Matrix Printer	15,000 Sets / Month	10,000 Sets
✓	Bluetooth Printer	30,000 Sets / Month	20,000 Sets
✓	Barcode Scanner	40,000 Sets / Month	20,000 Sets
✓	POS Machine	5,000 Sets / Month	10,000 Sets
✓	Magnetic Card Reader and Writer	45,000 Sets / Month	50,000 Sets
