

Euro USD Handheld-teller fact Bankbiljet Winkelafrekenmachines Bill-teller

(M / N: N10)

Kenmerken:

- I EEN Nalyzus de anti-vervalsingskenmerken van de valuta op dynamische en kwantitatieve wijze
- I whoge nauwkeurigheid en betrouwbaarheid
- I Easy voor het upgraden van de software
- I Redelijke structuur, gemakkelijke verrichting, mooie verschijning, betrouwbare prestaties, vloeibaar kristalvertoning
- I Ondersteunde valuta: Amerikaanse dollar, GBP, Euro, Indiase roepie, Chinese yuan

specificaties:

Valutabereik	AMERIKAANSE DOLLAR ,EUR,GBP,CNY
Functie	UV,MG,Led scherm
Grootte van telbare notitie	50mm * 88mm-90mm * 168mm
Energieverbruik:	AC220V 50Hz , AC110V 60Hz
Energieverbruik:	Dynamisch $\geq 3,5W$ statisch $\leq 0,15W$
hopper capaciteit:	1 pcs
Stacker capaciteit:	1 pcs
Dimensies:	23,5 * 17,5 * 9cm
Netto Gewicht	500g
Grootte van het karton	490 * 265 * 620mm (20 stks)
Bruto Gewicht	18 KG (20 stks)

Stroomadapter voor optie:

Relieve the Simple Obstacle

The machine has a sensitivity parameter which can customize the settings. Press the "currency" button to enter the state of parameter setting. Press the "function" button to choose a different gear. Press the "reset" button to change the sensitivity parameter. While the real currency is false alarm (E2) adjusting the gear sensitivity to F95; spectrum 1850nm (launch tube); Real currency is false alarm E25 adjusting the gear sensitivity to F94; spectrum 2.044nm (launch tube). If the data is bigger, then the sensitivity is higher. The default of starting gear is 6. It is better to adjust the parameter with the help of technician. There is an unformatted function HF (HF / ON) built-in. If misadjusting, we can press "function" button back to HF gear and press the "reset" button to ON, then press "currency" button to exit.

Alarming Code and Fault Code

Alarming Code	The Meaning of Code
E01	no detection abnormal
E02	middle magnetism abnormal
E03	down magnetism abnormal
E04	reverse infrared reflect abnormal
E05	UV light spectrum abnormal
E06	storage reflect abnormal
E07	infrared glass, overexposure
E08	width abnormal

Fault Code	Code Meaning
C01	encoder fault
C02	infrared camera tube fault
C03	fault - starting coupler
C04	key circuit
C05	key circuit
C06	up magnetism abnormal
C07	middle magnetism abnormal
C08	down magnetism abnormal

Fault Code	Code Meaning
C01	encoder fault
C02	infrared camera tube fault
C03	fault - starting coupler
C04	key circuit
C05	key circuit
C06	up magnetism abnormal
C07	middle magnetism abnormal
C08	down magnetism abnormal

Please carefully read the instructions before using the machine and operate it by following the steps.

The Disposition of Currency Detector

Open the package, please check whether the currency detector is intact, the attachment comprises the following materials: a currency detector, a manual, a warranty card, a power adapter 12VDC / 2A

Operating Instructions

1. Operation

the hopper. The detector will be started immediately and the banknotes will be sent into the machine. Then, the control panel will display the value or alert code. If the banknotes are sent into the machine by other way, the banknotes will back to the cash inlet and the alert code will be displayed with voice notice. In the process of identification, the real currency will exit from cash outlet, while the suspicious currency will exit from the cash inlet after alarming.

b. While detecting different currencies, press the corresponding "currency" button. Press "function" button to switch between the mode of single piece identification and the total continuous cumulative identification. Press the "reset" button to clear the interface and set zero.

c. In order to avoid the misjudgment, leveling the corner of the banknotes and removing the following banknotes. The repeating banknotes with plaster, soiled banknotes, damaged banknotes

2. Notice

a. Being away from the power adapter while using the currency detector. Meanwhile don't use it at the following environment: strong magnetic interference environment, using electric drill and other places.

b. This machine has the function of automatic sleeping. If the currency detector does not work within 5 minutes, it will enter into the state of sleeping. If the tested banknotes are put into the cash inlet, the machine will enter into the identification mode immediately.

c. If you don't use the machine for a long time, cut off the power, turn off the power switch.

Function

1. Function Introduction of the Interface

2. Parameter	
Input power	12VDC/2A
Power consumption	approx. < 10W, static < 10W
Display	1.024 display screen
Alarming signal	Alarming code and a voice signal "00"
Scope	USD, EUR, GBP
Detecting mode	Waveform identification, infrared identification, infrared identification, ultraviolet identification
Counting speed	< 200pcs
Size	140mm (width) x 140mm (height) x 140mm (depth)
Weight	100kg
Working temperature	0~40°C
