***description:***

Mini Bluetooth Printer is a USB compatible portable thermal printer.

The RS-232 serial port is connected to the Bluetooth communication interface, and the printer can be powered by the car charger.

And rechargeable battery (depending on the model selected). These special characters make it successful for a variety of instruments, handheld data printing.

***Application areas:***

Compared with traditional thermal ticket printers, Mini printers have the advantages of smaller size, more reliable performance, more stable printing and portability. Mini printers can work in many places, such as TAXI ticket printing, administrative fee printing, pos receipt printing, restaurant ordering information printing, online payment information printing, and more. With the rapid spread of smartphones, tablets, etc., Mini printers will be more widely used in the near future.
